Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 11-17, and 23-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Wada et al.

Wada et al disclose a developer-supplying system having a developer-storing part 20a to store a developer t, a photosensitive body 10 to form a latent image, and a developer transfer body 21 rotated to face the photosensitive body to transfer the developer from the developer-storing part to the photosensitive body to form a visible image according to the latent image (Col. 4, lines 12-14), a developer-supplying member 25 supplying the developer onto the developer transfer body and removing the residual developer which is not transferred onto the photosensitive body, and a residual developer-withdrawing member 28 disposed in a spaced-apart relation with and opposite to the developer-supplying member to withdraw the residual developer from the developer-supplying member (Fig. 2).

Wada et al further disclose the residual developer-withdrawer member is in the form of a roller (Fig. 2) and further comprising an agitator 22a to supply the developer to the developer-supplying member.

Allowable Subject Matter

3. Claims 2-10 and 18-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record do not teach a roller disposed in a spaced-apart relation with and opposite to the developer-supplying member having a withdrawal-electric field generating part to transfer the residual developer from the developer-supplying member onto the roller.

Response to Arguments

5. Applicant's arguments with respect to claims 1-24 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion
